Introduction of ISO 22301 Business Continuity Management System

ISO 22301 Business Continuity Management System (**BCMS**) is the international standard for business continuity management. It's designed to protect the business from potential disruption. This includes extreme weather, fire, flood, natural disaster, theft, IT outage, staff illness or terrorist attack. The ISO 22301 management system lets you identify threats relevant to your business and the critical business functions they could impact. And it allows you to put plans in place ahead of time to ensure your business doesn't come to a standstill.

Introduction of ISO 22301 BCMS Training

This 1-day ISO 22301 business continuity training workshop session provides participants with a solid understanding of business continuity management system. It is based on industry best practice and guidelines for business continuity and reviews the ISO 22301 Standard for business continuity management. Practical exercises and instructor-led discussions will help participants understand the benefits of business continuity management in an organization.
